Place: Hyderabad

Date: 29-11-2020

ABSTRACT

E-Learning Portal is a project which aims in developing an online application to provide Online Education, maintain Study Materials, keep Student records and collect Payments. This project has login features, Educator as Admin and Student as a user can login into their own portal separately. The Admin can login, through which the admin can monitor the whole system. This System can be used to search for course, add new courses, edit course, check payment status etc. The Admin after logging into his account can generate reports such as sell Report. The User can login into his account to follow course he purchased and can share his/her feedback.

Overall this project of ours is being developed to help the Educator (Admin) as well as Students (User) to provide Teaching-Learning platform in the best way possible.

Acknowledgment

It is a genuine pleasure to express our profound gratitude and deep regards to our teachers and friends for their exemplary guidance, monitoring and constant encouragement. We would like to express our special thanks to CBIT who gave us the golden opportunity to do this wonderful project on the topic “E-learning portal” which helped us in doing a lot of research and we came to know a lot of new things in this COVID pandemic staying at home.

1. INTRODUCTION

1.1 PROBLEM DEFINITION AND OBJECTIVES

The use of e-Learning technology in higher education institutions is no longer an option but has become a necessity. In an era known as the society of technology and knowledge, where lifelong learning is a way of life, it is important that educational institutions have as a priority the goal of finding effective ways of providing new learning opportunities according to their environment, student characteristics, teacher training, economic crisis and advancing technology in an effort to make learning more efficient, equitable and innovative in higher education.

Normally it has been practiced in higher education and corporate and occupational training contexts as a part of lifelong learning. However, with the emergence of new open and mobile platforms and web apps, a range of possibilities has opened to facilitate teaching and learning processes in fully on-site or blended environments. As a result, e-learning has been implemented in all educational systems, transcending the traditional idea of distance education.

A flexible web-based learning experience allows you to go through a guided curriculum or choose lessons on an as-needed basis. Following are the main objectives:-

- Ability to recall previously learned material – Students/learners can watch video courses as many times as they need. If they forgot something during the course they can come back and watch that specific part anytime.
- Creative way to present lesson – It is very creative way to present lectures. It will enhance teaching ability of tutor.
- Low Cost – As nobody needs to travel or rent anything so it's very cost efficient.
- High Quality – As tutor do not has time bound so he can teach in his own comfort time.
- Learn anytime from anywhere – Students/Learners can start learning anytime from anywhere they just required internet connection with a compatible device.
- Improve course quality according to learner's feedback – Tutor can improve their course as per student's feedback. It will help tutor to improve their ability to teach.
- Earn Money Online– As courses are paid so we can say it's an online teaching business which has no boundaries means students/learners can join from across the world so this system can make good business with good quality.

1.2 METHODOLOGIES

Usage of HTML,CSS,Java Script,PHP have been used to create various features in the platform to make it good looking and at the same time keeping it convinence of use high.

To make developments more features like video calling and live sessions have to be added.

1.3 SCOPE OF THE PROJECT

During this COVID-19 pandemic, E-learning has become a dire necessity for students as well as teachers. E-learning portal developed by us can be used by schools, colleges and universities for uploading courses online. The platform is designed in such a way that it is very easy to understand and use. So, even lower grade students can use it too.

1.4 DEVELOPMENT OF THE REPORT

The report submitted is of 6 chapters where each chapter has several sub topics.

2. LITERATURE SURVEY

2.1 INTRODUCTION TO THE PROBLEM DOMAIN TECHNOLOGY

It is difficult to find time for the training necessary to gain new skills and boost your productivity. With **E-Learning** you're able to learn at a pace that is comfortable for you. **E-learning** is a powerful Learning Management System implementing the latest trends in e-learning. E-Learning is learning utilizing electronic technologies to access educational curriculum outside of a traditional classroom. In most cases, it refers to a course, or program delivered completely online. We define eLearning as courses that are specifically delivered via the internet to somewhere other than the classroom where the professor is teaching. E-Learning has been proven to be a successful method of training and education is becoming a way of life for many citizens in India and across the World.

2.2 EXISTING SOLUTIONS

Most of the solutions for the E-learning portal already existed but due to the sudden pandemic of COVID-19, all of them went to high demand. Most of the courses in these products have been made available for free for students to learn.

2.3 TOOLS/TECHNOLOGIES USED

2.3.1 Software Requirements

Operating System	Windows 10
Front End	HTML, CSS, JavaScript
Back End	PHP
Library/ Framework	Bootstrap, JQuery, FontAwesome
Code Editor	Visual Studio Code
Database	MySQL
Web Server	Apache
Web Browser	Google Chrome
Payment Gateway	Paytm

Drawing Tools	yEd Graph Editor
	StarUML

2.3.2 Hardware Requirements

Processor	1.6 GHz or Faster Processor
RAM	4 GB
Disk Space	10 GB of Available Hard Disk
Graphic	DirectX 9-Capable Video Card
Display	1024 X 768 or Higher Resolution

3. DESIGN OF THE PROPOSED SYSTEM

3.1 Module Description

Input Module

In order to complete the tasks of the project and to get output by using this application work, there is need of some input based on the work that is to be carried out by using it. Different kinds of input are required for different purposes.

- Student/Learner Registration
- Course
- Lesson
- Feedback
- Payment Status

Output Module

The project named E-Learning portal is being made keeping in mind to solve the activities that are carried out in the Education. By using this, Admin can easily do many things like as:

- Student/Learner List
- Course Detail
- Lesson Detail
- Sell Report
- Payment Receipt

3.2 Modularization Detail

Without Registration

- **Home** – This module contains all the links of the application such as Courses, Payment Status, Login, Sign Up, Feedback Section and Contact.
- **Courses** – This module contains list of all the courses which are available.
- **Payment Status** – This module is used to check Payment status after purchasing a course.
- **Login** – This module is used to login into Student/Learner Panel.
- **Sign Up** – This module is used to register for the Student/Learner Panel.
- **Feedback** – This section shows feedback given by registered students/learners.

- **Contact** – Learner can use this section to contact the admin/tutor for any kind of queries.

Student Panel

- **Profile** – This module contains all the details about Student/Learner as well as Student can update their details.
- **My Courses** – This module contains list of all purchased courses.
- **Feedback** – This module is used to write feedback.
- **Change Password** – Students can use this module to change password.
- **Logout** – This module is used to return back to Home Page.

Admin Panel

- **Dashboard** – This module displays overview of whole application.
- **Courses** – This module contains all the courses.
- **Lessons** – This module contains all the lesson depends on course id.
- **Students** – This module displays all the registered student details.
- **Sell Report** – This module is used to view and print sells report.
- **Payment Status** – This module displays payment status in more details.
- **Feedback** – This module displays feedback given by students.
- **Change Password** – Admin can use this module to change password.
- **Logout** – This module is used to return back to Home Page.

Home: When the user click on this tab, it will display the other modules and pages of the website such as courses, payment status, login, sign up, popular section, feedback section, contact and admin login. This module will be used to display the brief introduction of the project and will show the title of the project.

Courses: Student can view all available courses by clicking on courses tab where he can choose course according to his own interest and by clicking on a particular course, will display more details with lesson title of the course, if he wants to purchase he will be able to make payment (required login).

Payment Status: After purchasing course student will be provided an order id which can be used to get the status of payment using Payment status tab. If student wants he can get print out of his payment status.

Login: This is a login form. Student/Learner can use their own email and password to login into the student panel.

Sign Up: This is a Registration form for new Students/Learners. New Students/Learners can fill up the form for registration and after successful registration they can use their email id and password to login into the application.

Feedback: This is very simple section which displays feedback given by the registered student.

Contact: Learner can use this section to contact the admin/tutor for any kind of queries.

Student Panel

Profile: Students/Learners can view their student id, registered email id, name, occupation, profile picture as well as they can modify and update the new data if they need.

My Courses: Students can view all courses which they purchased. This is the place where they can start watching lectures by clicking on Watch Course button which leads to course playlist where they can watch the entire lesson of course.

Feedback: Students can view/write feedback.

Change Password: Students can use this module to change password.

Logout: This module is used exit student panel and return back to Home Page.

Admin Panel

Dashboard: This module displays overview of whole application such as number of course, number of registered students etc.

Courses: This is the most important module of admin panel where Admin can view list of course as well as add new courses and modify or delete courses.

Lessons: Admin can view lesson based on course id as well as new lesson can be added to the course and modification or deletion is also possible using this module.

Students: Admin can view registered students details. Admin can add, edit and delete student.

Feedback: Admin can view/delete feedback given by student.

Sell Report: Analyzing sales is very import for any kind of business and this module is perfect for analyzing sales based on date. It will generate sells report which can be possible to print out for office records.

Payment Status: If student file any complaints regarding payment Admin can use this module to display payment status in more details such as bank name, transaction id, payment date etc.

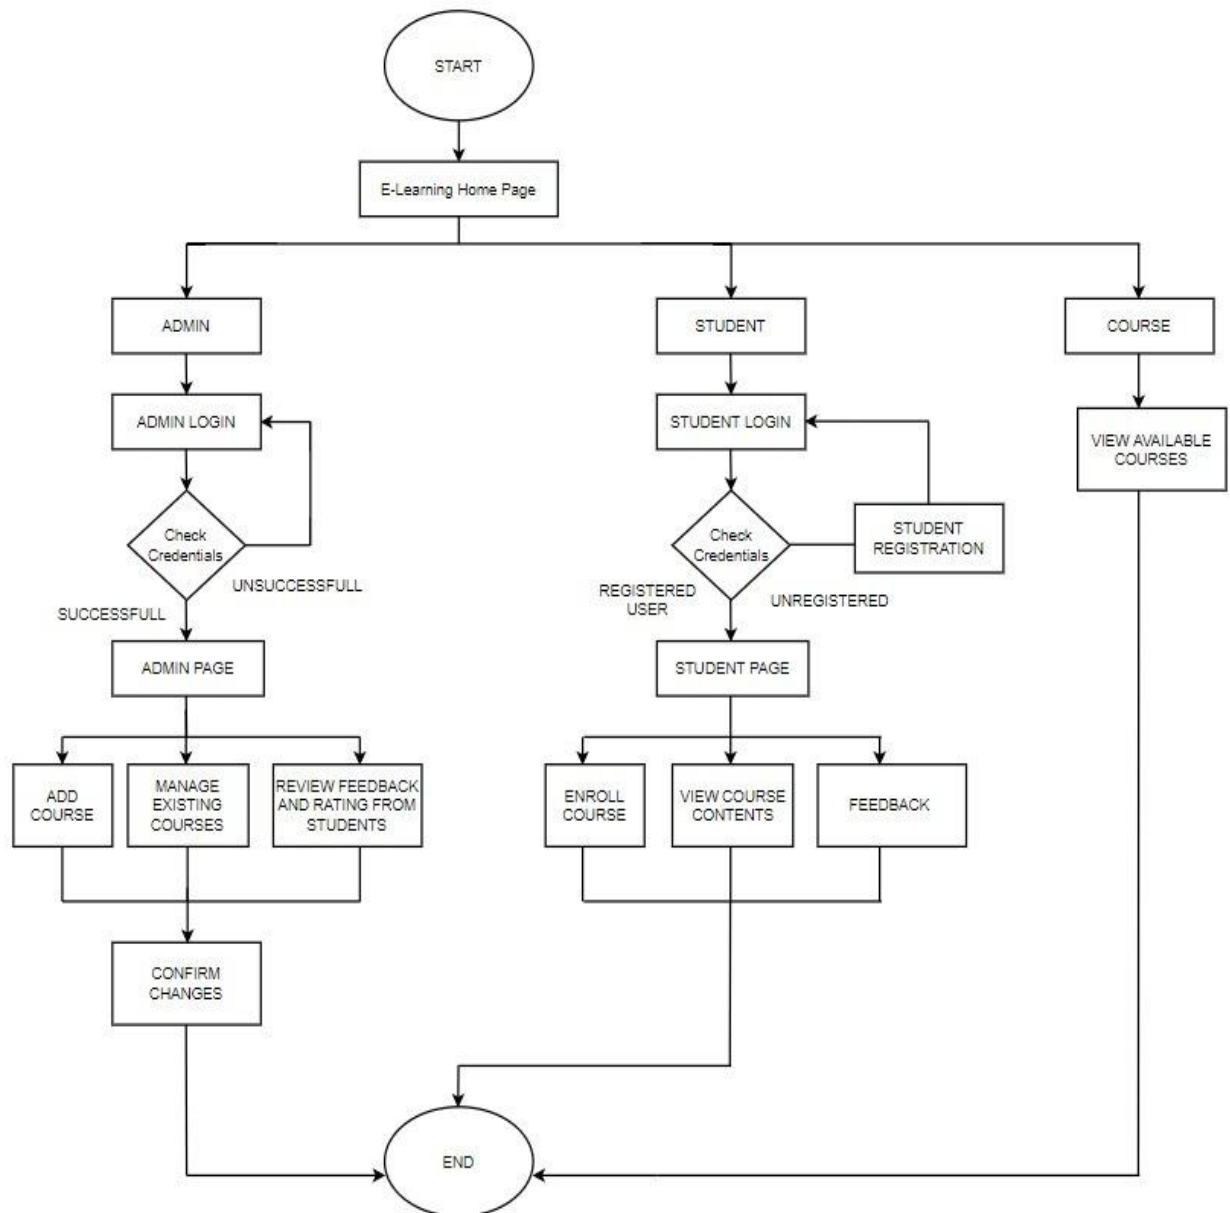

Change Password: Admin can use change password.

Logout: This module is used exit admin panel and return back to Home Page.

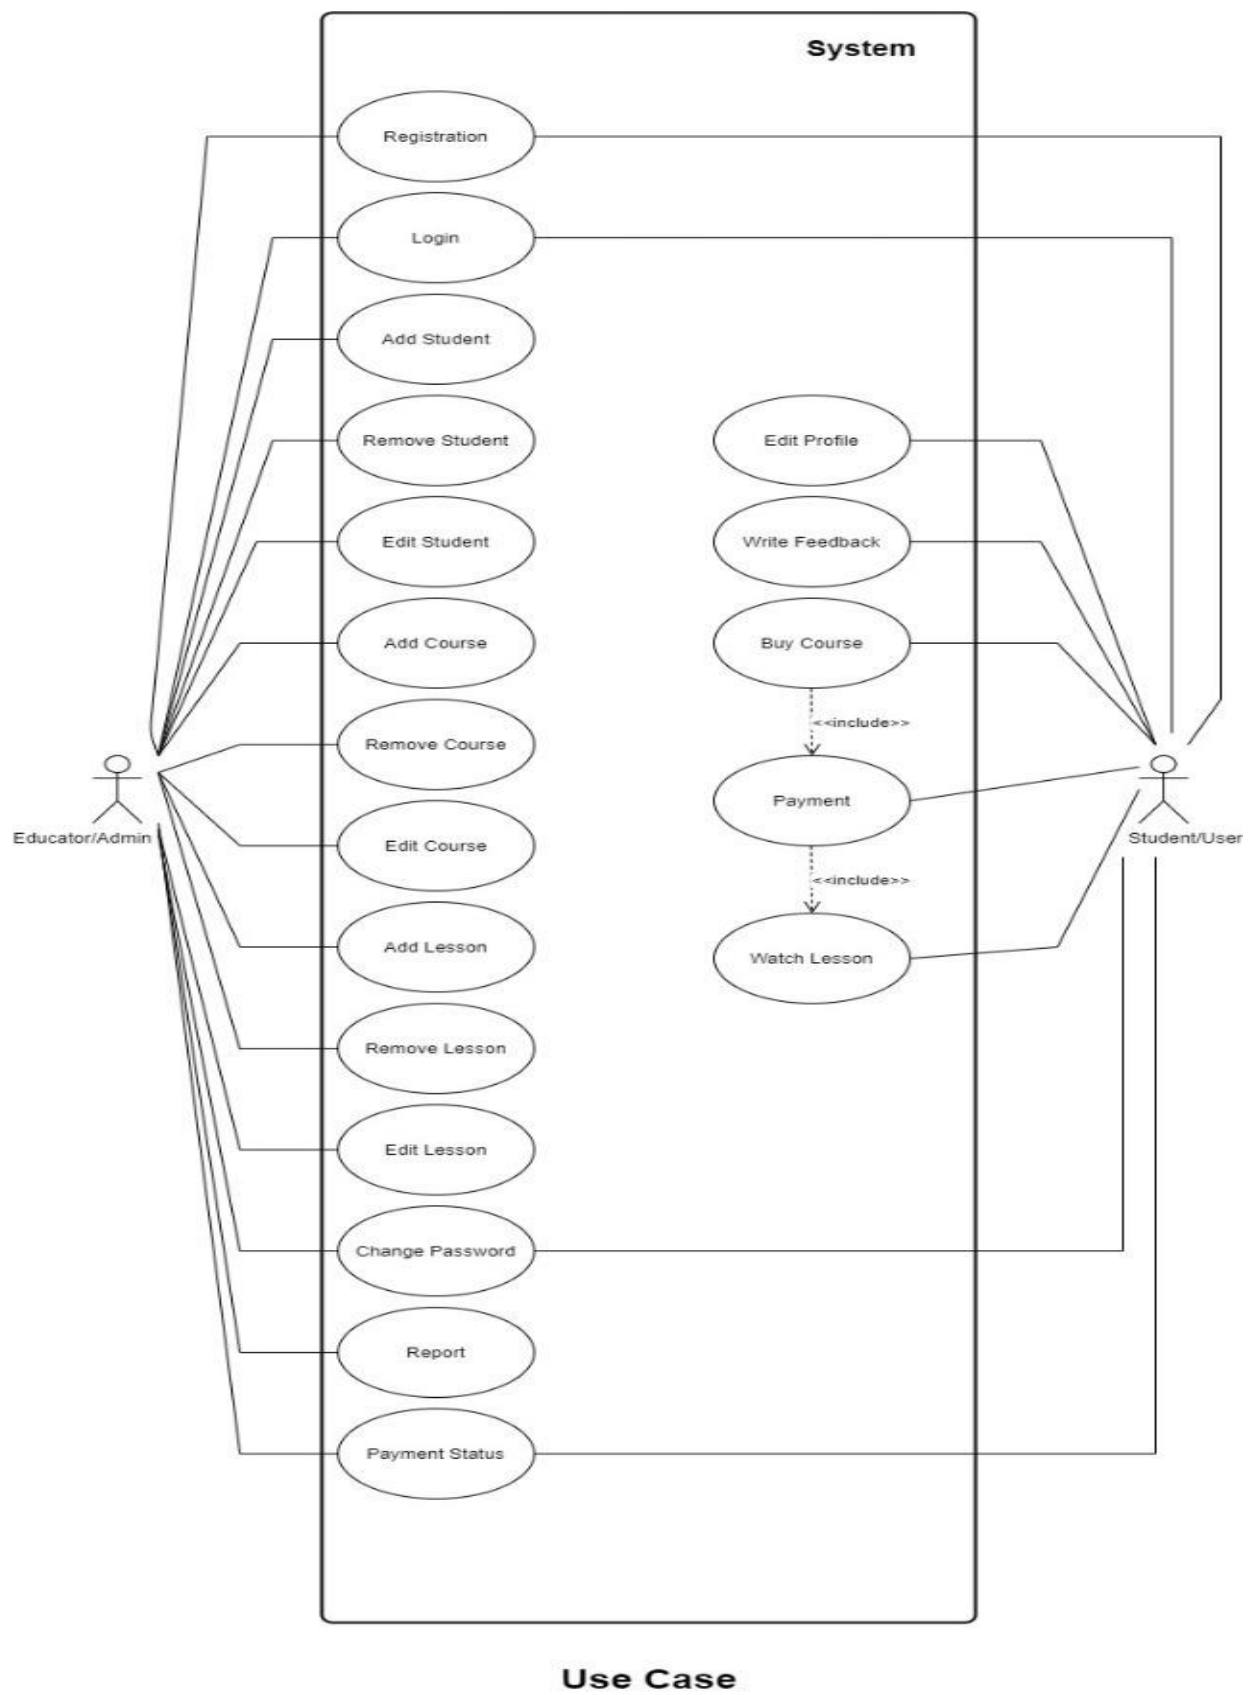

4. IMPLEMENTATION OF THE PROPOSED SYSTEM

4.1 Flowcharts / Use-Case / ER Diagrams

Student's Feedback

I am grateful to Elearning - both the faculty and the Training & Placement Department. They have made efforts ensuring maximum number of placed students. Due to the efforts made by the faculty and placement cell. I was able to bag a job in the second company.

Ant Man
Web Developer

Elearning is a place of learning, fun, culture, lore, literature and many such life preaching activities. .

Dr Strange
Web Developer

Think Magical, that is one thing that Elearning urges in and to far extent succeed in teaching to its students which invariably helps to achieve what you need.

Student Registration and Login

The screenshot shows the Elearning website with a modal form for student registration. The modal is titled "Student Registration" and contains the following fields and buttons:

- Name:** A text input field.
- Email:** A text input field with a note below it: "We'll never share your email with anyone else."
- New Password:** A text input field.
- Buttons:** "Sign Up" (blue) and "Close" (grey).

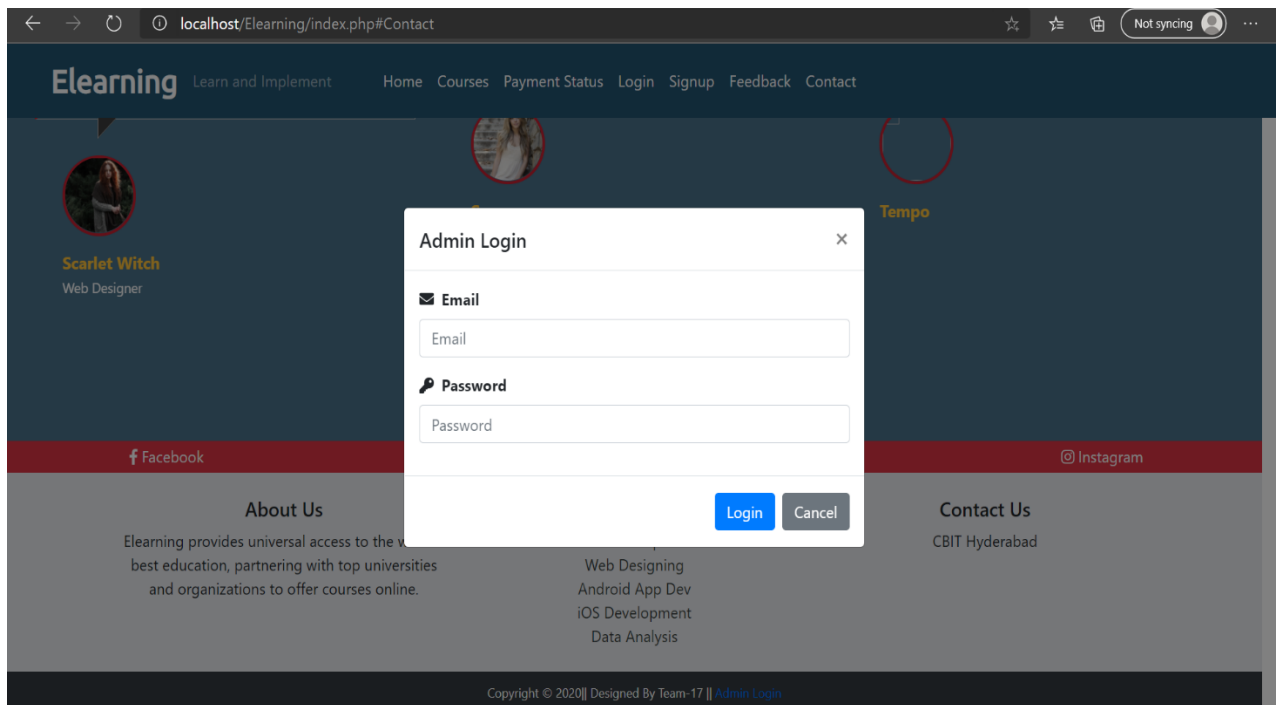

The background of the website shows a navigation bar with links: Home, Courses, Payment Status, Login, Signup, Feedback, Contact. Below the navigation bar, there are input fields for Name, Subject, E-mail, and a text area for "How can we help you?".

The screenshot shows the Elearning website with a modal form for student login. The modal is titled "Student Login" and contains the following fields and buttons:

- Email:** A text input field.
- Password:** A text input field.
- Buttons:** "Login" (blue) and "Cancel" (grey).

The background of the website shows the same navigation bar and input fields as the registration form.

ADMIN DASHBOARD EDIT FEEDBACK

The screenshot shows the 'E-Learning Admin Area' with a sidebar menu on the left containing: Dashboard, Courses, Lessons, Students, Sell Report, Payment Status, Feedback (selected), Change Password, and Logout. The main content area is titled 'List of Feedbacks' and contains a table with the following data:

Feedback ID	Content	Student ID	Action
3	Finally placed in an MNC due to Elearning initiative.	171	
8	I am grateful to Elearning - both the faculty and the Training & Placement Department. They have made efforts ensuring maximum number of placed students. Due to the efforts made by the faculty and placement cell. I was able to bag a job in the second company.	172	
9	Elearning is a place of learning, fun, culture, lore, literature and many such life preaching activities. .	173	
10	Think Magical, that is one thing that Elearning urges in and to far extent succeed in teaching to its students which invariably helps to achieve what you need.	174	
12	Knowledge is power. Information is liberating. Education is the premise of progress, in every society, in every family.	180	
13	Elearning is awesome.	182	

ADMIN ADD COURSE

The screenshot shows the 'E-Learning Admin Area' with the 'Add New Course' form. The sidebar menu is the same as in the previous screenshot. The form fields are:

- Course Name:
- Course Description:
- Author:
- Course Duration:
- Course Original Price:
- Course Selling Price:
- Course Image: No file chosen

At the bottom of the form are two buttons: and .

STUDENT DASHBOARD

The screenshot shows the 'E-Learning' Student Dashboard. The sidebar menu on the left contains: Profile (selected), My Courses, Feedback, Change Password, and Logout. The main content area shows the student's profile with the following information:

- Student ID:
- Email:
- Name:
- Occupation:
- Upload Image: No file chosen

At the bottom of the form is an button.

STUDENT COURSES ENROLLED

E-Learning

Learn Vue JS

The skills you will learn from this course is applicable to the real world, so you can go ahead and build similar app.

Duration: 2 Months
Instructor: Jay Shukla
Price: ~~₹14000~~ ₹ 100

[Watch Course](#)

Complete PHP Bootcamp

This course will help you get all the Object Oriented PHP, MySQLi and ending the course by building a CMS system.

Duration: 3 Months
Instructor: Rajesh Kumar
Price: ~~₹17000~~ ₹ 700

6. CONCLUSIONS / RECOMMENDATIONS

6.1.1 CONCLUSIONS

The E-Learning Portal has been computed successfully and was also tested successfully by taking "Test Cases". It is user friendly, and has required options, which can be utilized by the user to perform the desired operations.

The Software is developed using HTML, CSS, JS as front end and PHP, MySql as back end in windows environment.

The goals that are achieved by the software are:

- Simplification of the operations
- Less processing time and getting required information
- User friendly
- Portable and flexible for further enhancement

6.1.2 LIMITATIONS

- Only one tutor can access at a time
- It's not SEO friendly
- Risk unauthorized accessibility
- Support is good in modern web browsers but not in legacy ones

6.1.3 FUTURE SCOPE

- More than one tutor can be added
- Interaction between Student and Tutor can be improved by introducing Discussion forum
- Quiz Facility may enhance this application's market value
- Live Class can be added
